Connect ⊗

Notes on using this environment:

Connect with ssh to IP listed, and username listed.

Connect to reservation using SSH for Linux & Unix

You will need to have an X server running on your local computer and use an SSH client to connect to the system. If you did not click on the **Connect!** button from the computer you will be using to access the VCL system, you will need to return to the **Current Reservations** page and click the **Connect!** button from a web browser running on the same computer from which you will be connecting to the VCL system. Otherwise, you may be denied access to the remote computer.

Use the following information when you are ready to connect:

- **Remote Computer**: 134.190.5.116
- **User ID**: tvo
- **Password**: Mg7eDW

NOTE: The given password is for *this reservation only*. You will be given a different password for any other reservations.

NOTE: You cannot use the Windows Remote Desktop Connection to connect to this computer. You must use an ssh client.
